

## 70 Series Stainless Steel Liquid Level Sensor

The 70 series is a small side mounted vertical liquid level sensor designed for high temperature/high pressure operation and sensing chemically aggressive liquids. The design provides a cost effective solution where high reliability in a demanding environment is called for. It is ideal for applications in food, automotive, pharmaceutical and chemical industries. As shipped, the float switch is Normally Open and closes on rising to the switching point. This can be changed to Normally Closed and open on rising by inverting the float on the stem.
